Temperature Regulated Comfort

PC CUTBACK WHEELCHAIR CUSHION

Foot Propelling Perfection

Blake Medical is excited to introduce the **new** PC Cutback wheelchair cushion with revolutionary temperature regulating technology.

Designed using Kulkote phase change material with temperature regulating technology, the PC Cutback actively pulls and stores heat energy from the user to maintain a comfortable skin temperature of 86 degrees.

The PC Cutback ensures a cooler, more comfortable seat, greatly reducing the risk of moisture related pressure injuries due to perspiration. If the user begins to cool, the PC Cutback and its phase change material will release the stored heat energy to lessen the cooling effect.

The PC Cutback is also the first wheelchair cushion to utilize a Non Temperature Sensitive Memory Foam to keep the user comfortable in any temperature.

Premium layer of Kulkote for temperature regulation

Pressure reduction through a 1" non-temperature sensitive memory foam

Support and comfortable transition with a resilient 1" polyurethane foam core

Easier full leg stroke for foot propellers with a 1" Anterior Cutback

Slide prevention and security due to a firm 1/2" polyurethane foam ischial shelf

Support and stability with a 1" firm polyurethane foam base

ADAPTING TO YOUR NEEDS. EXCEEDING YOUR EXPECTATIONS.

Temperature Regulated Comfort

PC CUTBACK WHEELCHAIR CUSHION

The right cushion can make all the difference in the comfort and long-term health of a wheelchair user. Blake Medical is committed to utilizing the latest technology to provide the best products in the industry.

KülKöte®

KulKote is a temperature regulating technology. It's a proprietary coating consisting of water based polymers and Phase Change Materials (PCM).

An industrial product that is used in consumer goods, KulKote is typically applied to flexible foams, textiles, and/or fibers to regulate body temperature.

Most wheelchair cushions are either all foam or have foam components in them and are prone to absorbing and holding body heat.

As a result, the cushion gets (and stays) hot which makes for an uncomfortable situation. By regulating the temperature (narrowing the temperature variations), the user stays more comfortable.

FACT
Excess perspiration leads to skin breakdown

SOLUTION
PC Cutback cushion eliminates heat and moisture build-up

Agility.
Flexibility.
Responsiveness.

Blake Medical is a family-run business, and we strive to treat each client like a part of our family. If for any reason you are not happy with one of our products, please let us know and we will rectify the issue.

Our innovative engineers and committed customer service personnel are focused on ensuring a consistently positive customer experience that exceeds expectations.
