Foam Mattress

Non-powered mattresses offer:

- Immersive Comfort
- Custom Sizes Available
- ZERO Calibration
- ZERO risk of Power Failure
- Natural latex foam for more support

“A resilient and responsive sleep”

The Blatex mattress is a three layered foam mattress featuring a natural latex foam top layer. The Blatex is recommended for the sleeper who requires a more responsive sleep. Natural latex provides more feedback, or bounce, to give users more support than a memory foam surface. The 1 ¾” natural latex topper reacts and moves with your body while it’s breathing dimples ensure greater air flow and aid in the perfect sleep temperature.

The Blatex features a dual density foam base for added immersion and support.

The Blatex also features firm foam bolsters on each side to aid in transfers as well as ADL's.

The Blatex mattress is intended for the maintenance of skin health and is ideal for users with some degree of mobility and whom have lower risk of skin breakdown.

Warranty: 2 years on mattress, 1 year on cover
